

Professional design, installation and service of solar energy systems

Town of Windham, Maine PV Solar Project, 2013

39.78 kW Photovoltaic Power Project ----- Estimated Production of 46,654 kwh/year

- **\$117,000 system (estimated 2013 cost of \$2.94/watt), No upfront cost to Windham.**
 - ReVision Energy will finance, own and operate.
- **20 Year Power Purchase Agreement:** Windham will buy power at
 - **Years 1-6:** one cent discount below Windham's indexed market rate (10.5¢/kWh in year one)
 - **Years 7+:** indexed to Windham's market rate.
- **Windham to buy RECs at market rate:** with option to pre-purchase energy and RECs.
- **Option to purchase year 7:** Bargain Sale/Donation for **\$35,000 (70% discount over original cost).**
 - **Annual Energy Savings:** once Windham owns system, will provide \$5,500± annual savings.
 - **Long Term Savings:** 30-years savings estimated \$100,000. System life expectancy is 40+ years.
 - **Conservative financial modeling:** Higher electric rates will accelerate and increase savings.
- **Windham may forego buyout** and continue to purchase power and RECs after year 7 at market rates.
