# COMPOST BINS

## The Town of Windham Public Works

is offering **Compost Bins** for Windham Residents at **\$40.00 Per Bin**

You may pick up your *Compost Bin* at the

**Windham Town Office**  
**8 School Road**  
**Windham, ME 04062**

Monday - Friday: 8:00 am to 4:00 pm 892-1907  
For more information call Edra at: **892-1909**

A family using an *Earth Machine* can divert over **500 pounds** of kitchen scraps and yard waste per year. That's over one **billion pounds** of garbage transformed into valuable compost for our gardens each year!

Is made of a UV Resistant Polyethylene with 50% recycled content • Has an easy to use twist-locking lid designed to help control ventilation • Vents are large enough for air to circulate but too small for rodents • Easily assembled without tools • Dimensions are: 32" in diameter, 32" tall and has a volume of 80 gallons • Has no odor

## 2.5 billion at home injections...

**That's how many used needles can end up in the public solid waste**

### **SAFE MANAGEMENT of Sharps and Syringes** **The Problem:**

Sharps are syringes, lancets and other types of medical equipment that are used in the treatment of diabetes, allergies or other forms of home health care. Discarding loose sharps or syringes in the trash poses a risk to the people that collect and handle your garbage Used sharps can pass on germs and diseases. Even a single needle stick from a contaminated sharp can cause diseases like Hepatitis B or HIV, the virus that causes AIDS.

### **How to Dispose:**

Place used needles in used liquid detergent bottles or thick plastic containers & cap tightly. Put the container in your regular trash bag.

**DO NOT USE** thin plastic bottles such as milk jugs; they are too thin and needles will puncture through them.

## **BULKY WASTE**
